Math Scavenger Hunt

You and your group will be using an iPad to take a picture of as many of the 22 Scavenger Hunt items listed below as possible in the time given. You will have to be creative with some of the items!

- When we return to the classroom, you will create a Google Slide presentation (share the document with all members & llangan@falmouth.k12.ma.us)
- Here you will showcase your pictures. You may edit the photos as you want to best show the item.
- You can have multiple images on one slide as long as each is viewable.
- You may want to add text but everything must be related to the assignment.
- Be creative!
